

Teaching a Belly Box to “talk” to your Trackporter

1. Start with both the Trackporter and the Belly Box powered OFF
2. Press and hold the ENABLE Button **and** Left Joystick in the UP position, at the same time release the E-STOP. Keep holding for greater than ten seconds.
3. Release the buttons when the LEDs start blinking
4. Turn on the main power switch of the Trackporter. Only the Green LED should start to blink on the Transmitter
5. When the Transmitter is “ENABLED” the GREEN light will stop blinking
6. TEACH is complete. You should have full control of your Trackporter’s movement and the winch.
7. Enjoy!!
